

Stanislav Trotsyuk

Frontend / Fullstack Developer

Frontend / Fullstack Developer with 4+ years of experience building production web applications with React, Next.js, TypeScript and JavaScript.

I have experience developing enterprise applications, designing frontend architecture, integrating backend APIs and third-party services, and taking features from idea to production. Recently I've become increasingly interested in AI-assisted software development and productivity tools. Instead of simply implementing features, I enjoy designing products, validating ideas and building applications that solve real problems.

Recently, I have been actively developing my backend skills with Node.js, NestJS and FastAPI, while using AI tools such as Cursor, Claude and GPT to accelerate development. I focus on architecture, product thinking and delivering reliable solutions rather than simply generating code.

Tech Stack

Frontend

- React
- Next.js
- TypeScript
- JavaScript
- Tailwind CSS
- Redux Toolkit
- RTK Query
- Zustand
- React Hook Form
- Shadcn/ui

Backend

- Node.js
- NestJS
- FastAPI
- REST API
- PostgreSQL
- MySQL
- MongoDB

AI

- Cursor
- Claude
- ChatGPT
- Gemini
- OpenAI API
- YandexGPT
- Prompt Engineering

DevOps

- Git
- Docker (basic)
- CI/CD
- Nginx

Experience

May 2026 - Present

IT WEBS (Frontend / Fullstack Developer)

- Developed and maintain production web applications using Next.js, React and TypeScript for international clients. Developed backend modules using NestJS.
- Developed and maintain w3League.com, a production web application built with Next.js.
- Developed and maintain 147pacific.com using Next.js, implementing new features and adapting the application to client requirements.
- Developed and maintain hecosvc.com using Next.js, integrated Payload CMS, Saleor system.
- Worked with Payload CMS, extending content schemas with new blocks and customizing styles and frontend components.
- Integrated third-party APIs and services and adapt existing applications to evolving product requirements.
- Worked directly with clients, clarify requirements and independently deliver features to production.
- Used Cursor, Claude and GPT as part of the everyday development workflow to accelerate development and solve technical problems.

Jun 2025 - May 2026

IT WEBS (Fullstack developer)

- Designed and implemented frontend architecture for a modern Next.js application.
- Developed backend modules using NestJS.
- Integrated payment systems and third-party APIs.
- Implemented AI-powered features using YandexGPT.
- Configured Swagger API documentation.
- Optimized the production environment with Nginx.
- Participated in deployment and production maintenance.

Apr 2023 - Jun 2025

1M Solutions (Frontend developer)

- Developed and maintained enterprise React applications.
- Built reusable UI components and internal UI Kit.
- Participated in frontend architecture decisions.
- Mentored junior frontend developers.
- Improved internal coding standards and best practices.
- Collaborated with designers and backend developers in Scrum teams.

Other experience

- Payload CMS
- Saleor
- Payment integrations
- Swagger

○ Jan 2022 - Mar 2023

InLog (Frontend developer)

- Developed a Laboratory Information Management System (LIMS) using React and TypeScript.
- Migrated data layer from Redux Thunk to RTK Query.
- Designed configurable dashboard functionality.
- Built reusable UI components.
- Improved CI/CD pipeline and testing workflow with Jest.
- Participated in application architecture discussions.
